

References for the Bioinformatics Colloquium, 3/1/2005

Vaisman II.

Statistical and Computational Geometry of Biomolecular Structure.

Handbook of Computational Statistics, Springer: Berlin ; New York, 2004. p. 981-1000.
ISBN: 3540404643

Bostick DL, Shen M, Vaisman II.

A simple topological representation of protein structure: implications for new, fast, and robust structural classification.

Proteins. 2004 Aug 15;56(3):487-501.

PMID: 15229882

Tropsha A, Carter CW Jr, Cammer S, Vaisman II.

Simplicial neighborhood analysis of protein packing (SNAPP): a computational geometry approach to studying proteins.

Methods Enzymol. 2003;374:509-44.

PMID: 14696387

Masso M, Vaisman II.

Comprehensive mutagenesis of HIV-1 protease: a computational geometry approach.

Biochem Biophys Res Commun. 2003 May 30;305(2):322-6.

PMID: 12745077

Bostick D, Vaisman II.

A new topological method to measure protein structure similarity.

Biochem Biophys Res Commun. 2003 May 2;304(2):320-5.

PMID: 12711317

Zheng W, Cho SJ, Vaisman II, Tropsha A.

A new approach to protein fold recognition based on Delaunay tessellation of protein structure.

Pac Symp Biocomput. 1997;:486-97.

PMID: 9390317

Singh RK, Tropsha A, Vaisman II.

Delaunay tessellation of proteins: four body nearest-neighbor propensities of amino acid residues.

J Comput Biol. 1996 Summer;3(2):213-21.

PMID: 8811483
